#### **Single Rail Car Derailment, SPILL: 18-1344, Roseville, Placer County**

On 03/01/18 at 0547 hours the California State Warning Center (CSWC) received a report from Union Pacific Rail Road (UPRR) advising that a single flat car (Non Hazardous Plaque) had derailed upright due to a crossed draw bar in their railyard.

- There was no hazardous release and no injuries to crew.
- Crews responded to the scene to right the rail car at 0900 hours today, 03/01/18.
- CSWC personnel performed notifications per SOP.

### Cal OES SOUTHERN REGION

# SITUATION SUMMARY

## Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

### **Significant Precipitation, Potential Debris Flows, Santa Barbara County**

An upcoming storm system will bring significant precipitation through 03/03/18 for areas in Santa Barbara County.

- The heaviest precipitation is expected to occur the evening of 03/01/18 through the morning of 03/02/18 with rainfall rates expected to reach up to ½ inch per hour
- This creates a strong probability for debris flows to occur at recent burn scar areas.
- There are no mutual aid requests no search and rescue (SAR) mission tasking requests at this time

### **Activations**

- The Santa Barbara County Emergency Operations Center (EOC) is activated at Level 2 in preparation for the upcoming precipitation

### **Deployments**

- 1 Cal OES Southern Region Acting Regional Administrator (RA) deployed to Santa Barbara County EOC
- 1 Cal OES Southern Region Senior Emergency Services Coordinator (ESC) deployed to Santa Barbara County EOC
- 2 Cal OES Southern Region ESCs are deployed to the Santa Barbara County EOC

### **Evacuations**

- On 02/28/18 at 0800 hours, the Santa Barbara County Office of Emergency Management issued a Recommended Evacuation Warning for residents in the Thomas, Sherpa, and Whittier burn areas along the Santa Barbara County south coast (Goleta, Santa Barbara, Montecito, Summerland, and Carpinteria).
- Santa Barbara County will determine if a mandatory evacuation order will be needed by 0900 hours on 03/01/18

### **Shelter**

- An Evacuation Center was established at Earl Warren Showgrounds in anticipation of receiving any Access and Functional Needs (AFN) evacuees.
- City of Santa Barbara and City of Carpinteria have set up evacuation plans for those needing help with transportation to the shelter.
- If a Mandatory Evacuation is issued, Casa Dorinda, a life care community, will be fully evacuated which includes 300+ seniors and Assisted Living and Skilled Nursing residents. Plan is in place for evacuation.
- County Public Health has pre-identified those facilities and AFN patients within the proposed evacuation areas that may need assistance with transportation and have proper planning in place.

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- A Blizzard Warning has been issued for the Sierra today through Friday morning.
  - Multiple feet of snowfall are expected with dangerous and potentially life threatening blizzard conditions possible.
- An approaching storm system will bring rain and mountain snow to Southwest California late tonight into Friday.
  - Potential impacts include a possibility of minor to moderate debris flows in and near recent burn areas and localized flooding of low-lying areas.

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

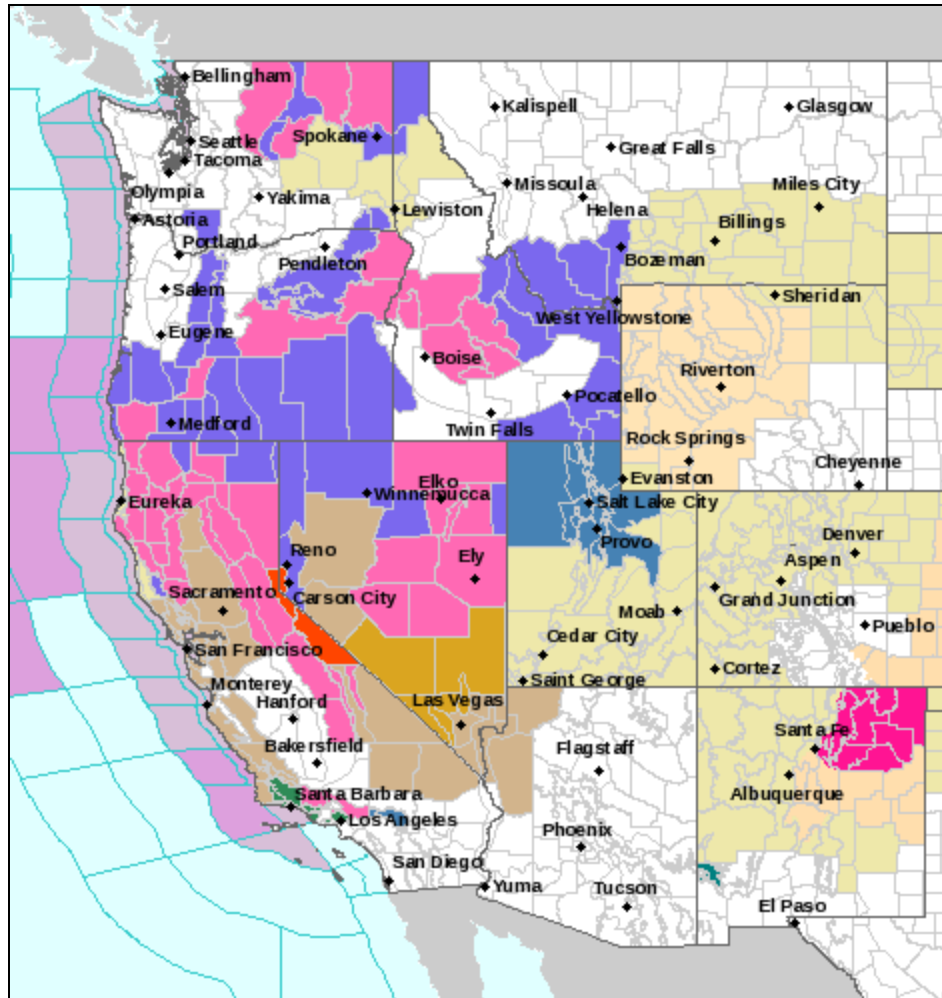

A major winter-type storm in Northern California will continue to spread eastward today. Another round of heavier precipitation is expected Friday and conditions will remain unsettled Saturday before somewhat warmer, much drier weather arrives Sunday for a couple of days followed by more precipitation the middle of next week.

Gusty southerly winds will continue Thursday with the strongest gusts mostly 25-40 mph, but locally stronger in the higher elevations especially. This is a significant storm with lower snow levels than most of our winter storms tend to have and travel will become challenging, especially through the mountains where travelers may encounter blizzard-like conditions at times. Snow levels today when the bulk of the precipitation occurs are going to fall to around 2,000 feet in the north and 3,500-4,000 feet in the south. Tonight through Saturday night will be the coldest period, and snow levels will drop to as low as around 1,500 feet in the north and 2,000-2,500 feet in the south, although some northern areas around 1,000 feet could see some overnight snow showers and light accumulation as well. Precipitation should be showery through much of that time, so snow accumulations at the lowest elevations are not expected to be more than a few inches. Storm total snow amounts could be around 4-6 inches near 2,000 feet and 1-2 feet over the mountain passes with significantly more than that likely at the higher elevations.

## **SOUTHERN CALIFORNIA**

A storm dropping down the West Coast will bring showers to Southern California starting tonight. Showers will continue across the area through Saturday evening. Most foothill and mountain locations will receive between 1 and 4 inches of rainfall and most coastal and valley locations will receive between a half inch and an inch of rainfall with this storm. The snow level will be between 5,000 and 6,000 feet. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas this afternoon through Saturday evening. Temperatures will be 5 to 10 degrees below normal through Saturday, with upper 30s and 40s across the mountains and 50s to low 60s in the valleys. A weak ridge of high pressure will bring a warming and drying trend to the region Sunday through early next week. Temperatures will warm to around 5 degrees above normal early next week.
